The General Contractors/Commercial & Industrial Construction list published in the Jan. 29, 2010 issue of the Volusia/Flagler Business Report contained errors in some of the listings that were the result of a technical glitch. This page is a corrected version of that list, which is ranked by the total value of projects that are permitted, currently under construction, or recently completed in 2010 in Volusia and Flagler counties. This corrected list also contains corrections and additions reported to the Business Report since the publication of the original list. The listings are based on company reports and various sources. Not all contractors with current projects are included. For further information, contact the Business Report via email at research@vfbr.com.

① A site plan for the Daytona Live! project has been approved. Only one of the planned building has been completed thus far.
